Then insert prepared USB drive into any USB slot on the printer back panel (E).

The printer beeps once as it registers the USB drive and tries to connect to WI-FI using configuration file. Connecting to WI-FI will take approximately 15 seconds.

If printer successfully connects to WI-FI it beeps with one long tone lights turn GREEN and configuration file on USB drive is changed to “wifi_ok”.

Printer is than accessible via the web browser on pws400k.local URL with Mainsal UI.

If connection is not successful, printer beeps 3 times, lights turns RED and file name is changed to “wifi_nok”. Please check that your WI-FI network is accessible, has reasonable signal strength and your WI-FI SSID (name) or PASSWORD is correct. And try again with new WI-FI configuration file.
